Tel : +62 24 866 0050 Fax : +62 24 866 0047/0049 RCR Cristalleria Italiana was founded in 1967 in the heart of Tuscany, thanks to an idea had by a group of craftsmen who, with passion and talent, brought the millenary tradition of glassmaking to a higher level. By introducing our 2021 catalogue, we hope to show you how passionately we hold on to the values that make our company one of a kind, our love for quality and respect for the environment.

All our products are made of Eco-Crystal, a material of the highest quality and made with total respect for the environment. Our factory has no need of a smokestack because our production is emission free and uses renewable energy to create 100% recyclable products.

Today, RCR Cristalleria Italiana stands out in the market of tableware, wine-tasting, home furnishings and mixology, combining tradition with fervent innovation, design and research, aiming to satisfy those who use our products for all occasions.

Choosing RCR Cristalleria Italiana and Eco-Crystal means counting on Made-in-Italy quality, knowing that you have done the right thing for your business and for the environment.

Mission

"To be a reliable, cutting edge supplier of superior quality crystal glass, the quintessence of Italian design for every moment of the consumer's lifestyle"

Vision

"Industrial, eco-friendly, state-of-the-art ultra-clear crystal glass, compliant with ethical and environmental standards, made with the care typical of artisanal production"

Manufacturing company

Production takes place entirely in Italy, in one factory located in Tuscany, where, through a complete vertical integration, every single step of the process is carefully monitored. We are a certified company, which allows us to guarantee service to our customers, and we export to over 110 countries around the world, guaranteeing globally recognised quality.

0% Atmospheric discharge

RCR employs only electric furnaces. The process of melting and fining is completely electric and without smoke emission.

100% Recyclable

The absolute pure raw materials used, allow the LUXION® ULTRACLEAR ECO-CRYSTAL GLASS to be 100% recyclable.

99,9% the percentage of internal cullet recovery. No polluting bleaching agents used in the process.

Only renewable energy

Photovoltaic panels: 23,000 m2 Biomass plant Geotermal Energy

The whole production process is completely electric while keeping an eye on consumption reduction.

Energy saving

In the last 10 years RCR has reduced its electric consumption by 45%, which is the equivalent of average consumption of a village of 5.845 people, while also reducing gas consumption by 28%, the equivalent of 2.586 residential heating. We were able to do that without losing production efficiency.

Energy recovery

At RCR we do not waste energy as it is constantly recycled. The energy released by machines is recovered and reused while the heating is conveyed in order to fuel the heating system.

Water recycling

We recycle 40% of water employed in the productive process while the part that we cannot recycle is decanted and treated to make it extremely pure.

Ethical approach in managing raw materials

RCR has decide not to use raw materials that release nitrogen oxides, the main responsible for acid rain. We decided to make our products without using rare raw materials that are usefull for medical purposes. For instance, we have chosen not to use Gadolinium because it is rare and essential for CT scan procedures.

Property/Material	Lead crystal	Superiore crystal glass	CRYSTAL GLASS	Comment
SONORITY (Density in kg/dm3)	2.9	2.5	2.6	A higher value guarantees high sonority and reflects the quality of the raw materials.
BRILLIANCE (Refraction index)	1.545	1.520	1.532	Higher values indicate greater ability of the glass to deflect light, producing effects typical of brilliants and cut glass.
TRANSPARENCY (Optical transmission at 30 mm thickness)	86%	87%	90%	Higher values indicate greater raw material purity and the enhanced ability of the glass to allow light to pass.
RESISTANCE TO SCRATCHES/FRICTION (Vickers Hardness)	450	520	540	Higher values guarante resistance to abrasions, nicks and scratches.
CAPACITY FOR KEEPING FOOD AND BEVERAGE TEMPERATURE STABLE (Vickers Hardness)	High	Low	High	Higher values guarante resistance to abrasions, nicks and scratches.
DISHWASHER RESISTANCE (Unaltered after 4,000 professional cycles)	incomplete	incomplete	guaranteed	Luxion® manages to pass the test of 4,000 professional cycles without losing brilliance.
DISHWASHER RESISTANC (Unaltered after 4,000 professional cycles)	CE 25%	0.50%	0.35%	The lower this percentage, the higher the safety for food contact.

14

What makes RCR unique

100% Made in Italy

A single production facility in Colle di Val d'Elsa (Tuscany).

Quality

Each product undergoes 7 inspections and resists over 4.000 professional dishwasher cycles.

Innovation

We launch approximately 40 new products every year.
R&D and Creative direction departments develop innovative projects in the fields of environment and design.

Production flexibility

Pressed and blown items of any size.

Expertise

Both internal and external laboratories develop constant chemical analysis and tests on product performances.

Service

Mould, glass cutting and decorating facilities.

Green Company

A modern line for a more stylish everyday table setting, with wide-bellied goblets to achieve perfect oxygenation of the wine, while the narrowing rim conveys the aromas by concentrating and enhancing them. The flute features laser points applied to the bottom of the glass which emphasize the bead of the sparkling wines with a spectacular rise of bubbles.

The Universum universal goblet is suitable for any type of red, white or sparkling wine. It is ideal for those looking for a multi-functional and accessible table setting, carefully designed to make it especially strong and sturdy for frequent use.

The goblet's curvature indicates the ideal amount to pour for tasting, but thanks to its versatility, it is also often used to serve aperitifs.

The Mule is not only the first Eco-Crystal mug dedicated to the Moscow Mule, but especially an innovative product for the mixology world. Its transparency enhances the colors of the cocktails while the handle allows for an ergonomic grip. The thickness of Luxion® Eco-Crystal guarantees a higher temperature maintenance than any other glass, for a drink that is always cold at the right point.

Davide Oldani, one of the greatest chef of the contemporary Italian cuisine, after working with Gualtiero Marchesi, Albert Roux, Alain Ducasse and Pierre Hermé, has revolutionized italian cuisine, creating "Cucina POP" - high quality and accessibility - by opening his restaurant D'O in 2003 in Cornaredo (MI). In December 2008 Davide Oldani was awarded the Ambrogino d'Oro by the City of Milan.

He was named Ambassador Expo 2015. In 2016 he inaugurated a restaurant in Manila, one in Singapour and opened his new D'O awarded the Tre Forchette

in the Milan Guide by Gambero Rosso. He was named Food & Sport Ambassador by CONI and selected as chef of Casa Italia for the Olympics Game in Rio.

His publications include: Cuoco andata e ritorno (2008), La mia cucina pop. L'arte di caramellare i sogni (2009), POP, La nuova grande cucina italiana (2010), Il giusto e il gusto (2012), Storie di sport e cucina (2013), CheFacile (2013), D'O eat better (2016).

The cake stand is more than a simple cake and biscuits shelf. It is a display stage, a pedestal for your creations: from the colourful cupcakes to the fragrant gingerbread biscuits!

Selection ommelier

"Savouring a good wine is an art that engages every sense.

Because if smell and taste must be caressed, the gaze wants to be captured, seduced."
Style guidelines laid down by Luca Martini, voted world's top sommelier in 2013.

Luca Martini World's Best Sommelier

ENOLOGICAL TOOLS

Recommended for red, white and sparkling wines

U55 is a universal glass, suitable for tasting all wines but also for drinking tasty cocktails or beers. The glass was designed so that it is angled precisely for 10 cl, which makes it very practical for wine bars and venues serving by the glass.

Universum Goblet - U55

Calice U55 Goblet U55

25159020706 cl 55 oz 18,60 h.220 mm ø max 96 mm 6x2

A well-balanced glass for the perfect oxygenation of wine for its total flexibility.

The glass was designed so that it is angled precisely for 10 cl.

56 nvino

Red Wines

Recommended for Syrah, Ganache and Schioppettino

I56 is recommended for all young red wines or types that require a slower interaction with oxygen. A quite elongated stem keeps hands at a good distance from the bowl to avoid overheating wine. The rim is narrower than the bowl, allowing aromas to integrate with the sensory spectrum. This wineglass is recommended for tasting Syrah, Ganache and Schioppettino. Very young wines with violet hues and hints of pepper and bell peppers.

Invino Goblet - 156

Calice 156 Goblet 156

25516020106 cl 56 oz 19,10 h.235 mm ø max 93 mm 6x2

 $Fine, reinforced\ laser-cut\ edge.$

Its wider bowl and narrower rim give a sense of verticality to the product, ensuring that these varietals, which are still very young, are further enhanced by the goblet. for its total flexibility.

White Wines

Recommended for Pinot Nero

145 is recommended for Chardonnay, Trebbiano and Tocai, wines with a more complex expression of their fragrance, so requiring a more flared glass of significant capacity. The wine can then breathe as much as possible and showcases the tropical notes of Chardonnay, the hints of lime in Trebbiano, and the almond notes of Tocai. A wineglass recommended for white wines of medium–long ageing, especially those that need to breathe. A good choice for all organic and biodynamic wines produced without sulphur dioxide or for those macerated on the skins.

Calice 145 Goblet 145

26195020106 cl 45 oz 15,11 h.220 mm ø max 84 mm 6x2

A larger belly and bowl, while the shrinking rim allows medium-structured and medium-complex wines to come out at their best..

RCR lets you customize your product with the most advanced Made-in-Italy techniques, resulting in the highest quality work that is safe and resistant over time.

MOULD EMBOSSING

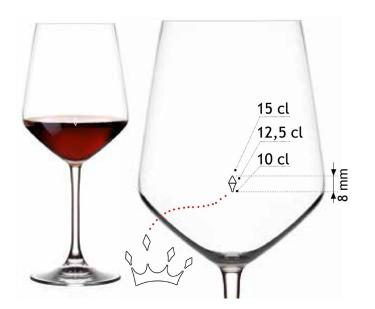

B₂B

Each glass and goblet can be customised with your company logo engraved in the glass in bas-relief. The logo will be placed on the bottom and therefore clearly visible every time the glass is used, while for the wine glass, it can also be placed on the foot. A possibility that requires a decidedly limited investment and minimum production, but with a certain return on image and a finished product of the highest quality.

POUR LINE

With laser engraving, it is possible to add a pour line to any glass, for a perfect wine tasting experience. The pour line is resistant to industrial dishwashers.

CUSTOM LASER ENGRAVING

A high-tech process that uses a laser to engrave the product, which allows for very detailed decoration. It is a flexible customisation method, perfect both for a company logo that can be applied on any smooth surface and for decoration in bands or all around the glass. Dishwasher safe.

DIAMOND ENGRAVING

RCR is one of the few glassmakers with an in-house engraving department, which allows for high-quality customisations. The engravings are done by specialised personnel with diamond wheels and can be either frosted or polished based on customer requirements.

B₂B

RCR lets you customize your product with the most advanced Made-in-Italy techniques, resulting in the highest quality work that is safe and resistant over time.

SAND ENGRAVING

The design on the product is obtained by sandblasting, which creates a refined frosted effect that brings to mind the finest craftsmanship. The engraving is deeper than a laser engraving, but more nuanced and minimal in the details. Dishwasher safe.

SERIGRAPHY

This is the process that allows for the greatest number of details and the only one that allows the application of coloured decorations with organic and certified pigments. Dishwasher safe.

COLOUR

Our products are coloured with certified organic colours and through a process using nebulised air, offering a translucent colour that is dishwasher safe.

GOLD AND PLATINUM EDGING

Typical of RCR's top-tier traditional tableware, in gold and platinum versions, using the nuance required by the customer. The decoration is resistant but the items should be washed with care, using non-abrasive detergents. A customization method that applies a band or fine-line decoration flush with the rim of rim of the product.based on customer requirements.
